**Helpful Hints:** If you spray the measuring cup with cooking spray before measuring honey, it will pour out much easier. Use a cookie scoop to shape the balls if kids don't like getting their fingers messy. Any size or shape cookies are fine. Let kids be creative!

**Safety Tips:** Until after a baby's first birthday, avoid giving honey or corn syrup in any form. Honey can cause botulism, a severe foodborne illness in babies. For adults and older children, these spores are harmless.
