How many liquid ounces are in a cup? Look at a glass or plastic measuring cup. There are 8 ounces in a cup. When you measure liquids, remember to look eye level at the amount in the cup for accurate measurement.

Safety Tip: Store milk in the refrigerator. If it tastes sour, don’t drink the rest of it. Sour milk won’t make you sick, but it just doesn’t taste very good. Check the “sell by” date on the carton of milk. That’s the date when the store needs to sell it. Once the carton is open at home, it will only keep fresh about five days.
